

## MFE/3F Review Questions Answer Key

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com), or purchase a hard copy from [www.actexamdriver.com](http://www.actexamdriver.com), or [www.actuarialbookstore.com](http://www.actuarialbookstore.com).

### Chapter 9 – Parity and Other Option Relationships

9.1	C	Put-Call Parity	9.31	E	Max and Min Option Prices
9.2	B	Put-Call Parity	9.32	C	Strike Price Grows Over Time
9.3	B	Put-Call Parity	9.33	E	Strike Price Grows Over Time
9.4	C	Put-Call Parity	9.34	C	Strike Price Grows Over Time
9.5	D	Put-Call Parity	9.35	A	Proposition 2
9.6	A	Put-Call Parity	9.36	C	Proposition 3
9.7	D	Synthetic Stock	9.37	E	Proposition 2
9.8	D	Synthetic T-bills	9.38	D	Proposition 1
9.9	A	Synthetic Stock	9.39	C	Proposition 3
9.10	E	Currency Options	9.40	A	Bid-Ask Prices
9.11	A	Currency Options	9.41	C	App. of Option Pricing Concepts
9.12	C	Currency Options	9.42	C	Early Exercise
9.13	A	Options on Bonds	9.43	A	Put-Call Parity
9.14	E	Options on Bonds	9.44	D	Early Exercise
9.15	B	Options on Bonds	9.45	B	Exchange Options
9.16	D	Exchange Options	9.46	E	Reverse Conversion
9.17	A	Exchange Options	9.47	B	Strike Price Grows Over Time
9.18	D	Exchange Options	9.48	E	Bounds on Option Prices
9.19	E	Exchange Options	9.49	C	Propositions 2 and 3
9.20	B	Exchange Options	9.50	A	Option Payoffs
9.21	A	Currency Options	9.51	D	Strike Price Grows Over Time
9.22	E	Currency Options	9.52	D	Arbitrage
9.23	B	Currency Options	9.53	E	Min of 2 Assets
9.24	D	Currency Options	9.54	A	Max of 2 Assets
9.25	B	Currency Options	9.55	D	Max of 2 Assets
9.26	B	Currency Options	9.56	B	Max of 2 Assets
9.27	C	Options on Currencies	9.57	D	Bounds on Option Prices
9.28	C	Currency Options	9.58	D	Early Exercise of Amer. Call
9.29	B	Exchange Options	9.59	B	Put-Call Parity
9.30	C	Exchange & Currency Options	9.60	A	Put-Call Parity
			9.61	A	Option Pricing Concepts

## Chapter 10 – Binomial Option Pricing: I

10.1	C	One-Period Binomial Tree	10.36	E	Options on Currencies
10.2	B	One-Period Binomial Tree	10.37	A	Options on Currencies
10.3	D	Delta	10.38	D	Options on Futures Contracts
10.4	A	Replication	10.39	A	Options on Futures Contracts
10.5	B	One-Period Binomial Tree	10.40	A	Options on Futures Contracts
10.6	E	Arbitrage	10.41	E	Two-Period Binomial Model
10.7	C	Graphical Binomial Formula	10.42	E	3-Period Binomial Model: Currency
10.8	D	Graphical Binomial Formula	10.43	D	Risk-Neutral Probability
10.9	E	Risk-Neutral Probability	10.44	D	Replication
10.10	E	Arbitrage	10.45	B	One-Period Binomial Tree
10.11	B	One-Period Binomial Tree	10.46	C	Replication
10.12	B	Two-Period Binomial Tree	10.47	D	Replication
10.13	D	Two-Period Binomial Tree	10.48	E	Replication
10.14	B	Two-Period Binomial Tree	10.49	E	Replication
10.15	D	Two-Period Binomial Tree	10.50	A	Delta
10.16	B	Three-Period Binomial Tree	10.51	A	Replication
10.17	A	Three-Period Binomial Tree	10.52	E	Greeks in Binomial Model
10.18	A	Three-Period Binomial Tree	10.53	B	Greeks in Binomial Model
10.19	C	Three-Period Binomial Tree	10.54	B	Greeks in Binomial Model
10.20	C	Three-Period Binomial Tree	10.55	E	Three-Period Binomial Tree
10.21	C	Three-Period Binomial Tree	10.56	A	Greeks in Binomial Model
10.22	B	Three-Period Binomial Tree	10.57	A	Three-Period Binomial Tree
10.23	B	Four-Period Binomial Tree	10.58	A	Options on Futures Contracts
10.24	E	Three-Period Binomial Tree	10.59	C	Options on Futures Contracts
10.25	D	Three-Period Binomial Tree	10.60	C	American Put Option
10.26	D	Mult.-Period Binomial Tree	10.61	A	American Call Option
10.27	C	Mult.-Period. Binomial Tree	10.62	E	American Put Option
10.28	B	Put-Call Parity	10.63	B	Arbitrage in the Binomial Model
10.29	C	Replication	10.64	C	Theta in the Binomial Model
10.30	C	Option on a Stock Index			
10.31	A	Option on a Stock Index			
10.32	A	Option on a Stock Index			
10.33	E	Options on Currencies			
10.34	E	Options on Currencies			
10.35	D	Options on Currencies			

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 11 – Binomial Option Pricing: II

11.1	C	State Prices	11.26	D	J-R Binomial Tree
11.2	D	Perpetual Options Early Exercise	11.27	A	J-R Binomial Tree
11.3	C	Perpetual Options Early Exercise	11.28	A	J-R Binomial Tree
11.4	B	Perpetual Options Early Exercise	11.29	D	J-R and CRR Binomial Trees
11.5	C	Exercise Boundaries	11.30	B	Alternative Binomial Trees
11.6	E	Exercise Boundaries	11.31	C	Utility Values & State Prices
11.7	D	Risk-Neutral Pricing	11.32	E	Utility Values & State Prices
11.8	D	Expected Return	11.33	E	Utility Values & State Prices
11.9	C	Expected Return	11.34	D	Utility Values & State Prices
11.10	A	Expected Return	11.35	A	Utility Values & State Prices
11.11	B	Realistic Probability	11.36	D	Utility Values & State Prices
11.12	C	Expected Return	11.37	A	Utility Values & State Prices
11.13	B	Expected Return	11.38	C	Utility Values & State Prices
11.14	C	Expected Return	11.39	B	Utility Values & State Prices
11.15	E	Expected Return	11.40	B	Arbitrage
11.16	D	Expected Return	11.41	B	Realistic Probability
11.17	D	Expected Return	11.42	D	Greeks in J-R Binomial Model
11.18	C	CRR Binomial Tree	11.43	D	State Prices
11.19	A	CRR Binomial Tree	11.44	E	Utility Values & State Prices
11.20	B	CRR Binomial Tree	11.45	B	Utility Values & State Prices
11.21	A	CRR Binomial Tree			
11.22	B	CRR Binomial Tree			
11.23	D	J-R Binomial Tree			
11.24	C	J-R Binomial Tree			
11.25	C	J-R Binomial Tree			

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 12 – The Black-Scholes Formula

12.1	D	Black-Scholes Call Price	12.31	C	Greek Measures for Portfolios
12.2	B	Black-Scholes Put Price	12.32	E	Black-Scholes, Prepaid Forward
12.3	A	Black-Scholes, Prepaid Forward	12.33	D	Implied Volatility
12.4	B	Options on Currencies	12.34	D	Calendar Spread
12.5	C	Options on Currencies	12.35	C	Options on Currencies
12.6	C	Options on Currencies	12.36	A	Options on Currencies
12.7	C	Options on Futures	12.37	D	Options on Futures Contracts
12.8	B	Options on Futures	12.38	C	Black-Scholes Put Price
12.9	B	Options on Futures	12.39	A	Black-Scholes and Delta
12.10	A	Options on Futures	12.40	A	Black-Scholes Call Price
12.11	B	Greek Measures for Portfolios	12.41	C	Option Volatility
12.12	E	Delta	12.42	C	Black-Scholes Formula
12.13	C	Delta	12.43	D	Black-Scholes, Prepaid Forward
12.14	B	Elasticity	12.44	D	Black-Scholes, Prepaid Forward
12.15	E	Greek Measures for Portfolios	12.45	E	Currency Options, Black-Scholes
12.16	E	Greek Measures for Portfolios	12.46	C	Portfolio Delta & Elasticity
12.17	B	Elasticity	12.47	D	Delta
12.18	E	Elasticity	12.48	B	Options on Currencies
12.19	A	Sharpe Ratio	12.49	E	Options on Currencies
12.20	C	Elasticity	12.50	D	Elasticity
12.21	D	Options on Currencies	12.51	C	Elasticity
12.22	B	Option Elasticity	12.52	D	Options on Futures
12.23	D	Elasticity of a Portfolio	12.53	D	Options on Futures
12.24	B	Risk Premium of a Portfolio	12.54	A	Holding Period Profit
12.25	E	Sharpe Ratio	12.55	A	Call Option Delta
12.26	A	General	12.56	B	Black-Scholes Formula
12.27	B	Greek Measures for Portfolios	12.57	D	Black-Scholes Formula
12.28	A	Holding Period Profit	12.58	D	Theta
12.29	D	Black-Scholes Call Price	12.59	A	Option Volatility
12.30	B	Black-Scholes Put Price	12.60	E	Option Volatility

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 13 – Market-Making and Delta-Hedging

13.1	A	Delta-Hedging	13.31	E	Delta-Rho Hedging
13.2	C	Market-Maker Profit	13.32	C	Delta-Gamma-Rho Hedging
13.3	E	Market-Maker Profit	13.33	A	Delta-Gamma-Vega Hedging
13.4	A	Delta-Hedging	13.34	A	Delta-Gamma-Rho-Vega Hedging
13.5	B	Market-Maker Profit	13.35	E	Delta-Gamma-Rho-Vega Hedging
13.6	C	Market-Maker Profit	13.36	C	Delta Hedging & B-S Eqn.
13.7	E	Market-Maker Profit	13.37	E	Static Option Replication
13.8	D	Delta	13.38	A	Delta-Hedging
13.9	A	Market-Maker Profit	13.39	A	Delta-Hedging
13.10	D	Delta Approximation	13.40	C	Delta-Gamma Hedging
13.11	D	Delta-Gamma Approximation	13.41	B	Delta-Hedging
13.12	C	Delta-Gamma-Theta Approx.	13.42	B	Market-Maker Profit
13.13	B	Market-Maker Profit	13.43	E	Frequency of Re-Hedging
13.14	B	Market-Maker Profit	13.44	D	Frequency of Re-Hedging
13.15	D	Market-Maker Profit	13.45	D	Delta-Gamma Hedging
13.16	B	Black-Scholes Equation	13.46	B	Frequency of Re-Hedging
13.17	E	Black-Scholes Equation	13.47	A	Market-Maker Profit
13.18	B	Black-Scholes Equation	13.48	D	Market-Maker Profit
13.19	B	Frequency of Re-Hedging	13.49	C	Market-Maker Profit
13.20	D	Frequency of Re-Hedging	13.50	C	Market-Maker Profit
13.21	D	Frequency of Re-Hedging	13.51	C	Delta-Gamma Approximation
13.22	B	Frequency of Re-Hedging	13.52	B	Delta-Gamma Hedging
13.23	D	Frequency of Re-Hedging			
13.24	B	Frequency of Re-Hedging			
13.25	D	Delta-Gamma Hedging			
13.26	A	Delta-Gamma Hedging			
13.27	C	Delta-Gamma Hedging			
13.28	E	Delta-Gamma Hedging			
13.29	B	Delta-Gamma Hedging			
13.30	A	Delta-Rho Hedging			

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 14 – Exotic Options: I

14.1	B	Asian Options	14.36	A	Barrier Options
14.2	C	Asian Options	14.37	D	Gap Options
14.3	A	Delta of Asian Option	14.38	E	Asian Options
14.4	B	Barrier Options	14.39	A	Compound Options
14.5	E	Asian Options	14.40	B	Asian Options
14.6	D	Asian Options	14.41	C	Barrier Options
14.7	E	Barrier Options	14.42	B	Gap Options
14.8	C	Barrier Options	14.43	E	Asian Options
14.9	E	Barrier Options	14.44	C	Compound Options
14.10	D	Barrier Options	14.45	A	Compound Options
14.11	A	Barrier Options	14.46	C	Path-Dependent Options
14.12	A	Barrier Options	14.47	D	Chooser Options
14.13	A	Compound Options	14.48	D	Chooser Options
14.14	C	Compound Options	14.49	A	Forward Start Option
14.15	B	Compound Options	14.50	D	Forward Start Option
14.16	D	Compound Options	14.51	A	Forward Start Option
14.17	B	Compound Options	14.52	A	Forward Start Option
14.18	B	Compound Options	14.53	E	Forward Start Option
14.19	D	Gap Options	14.54	C	Chooser Options
14.20	C	Gap Options	14.55	E	Chooser Options and Delta
14.21	A	Gap Options	14.56	C	Gap Options
14.22	B	Gap Options	14.57	D	Chooser Options
14.23	C	Gap Options	14.58	B	Exchange Options
14.24	C	Gap Options	14.59	D	Forward Start Options
14.25	D	Gap Options	14.60	C	Forward Start Options
14.26	C	Gap Options	14.61	C	Barrier Options
14.27	E	Exchange Options	14.62	C	Barrier Options
14.28	C	Exchange Options	14.63	A	Exchange Options
14.29	E	Exchange Options	14.64	D	Exchange Options
14.30	A	Exchange Options	14.65	E	Exchange Options
14.31	E	Exchange Options	14.66	A	Am. Call on Div. Paying Stock
14.32	B	Exchange Options	14.67	B	Barrier Options
14.33	C	Exchange Options	14.68	A	Asian Options
14.34	D	Exchange Options	14.69	C	Gap Put-Call Parity
14.35	D	Exchange Options			

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 18 – The Lognormal Distribution

18.1	C	The Lognormal Distribution	18.26	B	Partial Expectations
18.2	C	Converting to a Std. Normal RV	18.27	B	Conditional Expectation
18.3	A	Sums of Normal RVs	18.28	C	Partial Expectation
18.4	D	Median Stock Price	18.29	A	Conditional, Partial Expectation
18.5	A	Expected Value	18.30	D	Order Statistics
18.6	B	Elasticity and Risk Premium	18.31	A	Quantiles
18.7	B	Stock Price Probabilities	18.32	E	Quantiles
18.8	E	Conditional Expectation	18.33	D	The Lognormal Distribution
18.9	E	Effect Inc. Time Until Maturity	18.34	E	The Normal Distribution
18.10	D	Confidence Intervals	18.35	C	The Black-Scholes Model
18.11	C	Prob. That Stock Price $> K$	18.36	B	Probability of Future Stock Price
18.12	C	Exp. Value Future Stock Price	18.37	A	Quantiles
18.13	A	Median of Future Stock Price	18.38	D	Conditional Expectation
18.14	B	Probability of Future Stock Price	18.39	B	Confidence Intervals
18.15	B	Median of Future Stock Price	18.40	A	Covariance of $S_t$ and $S_T$
18.16	E	Prob. That Stock Price $< K$	18.41	B	Covariance of $S_t$ and $S_T$
18.17	A	Median of Future Stock Price			
18.18	C	One Standard Deviation Move			
18.19	B	One Standard Deviation Move			
18.20	C	Two Standard Deviation Move			
18.21	D	Two Standard Deviation Move			
18.22	E	Effect Inc. Time Until Maturity			
18.23	A	Compare Stock & Risk-free Bond			
18.24	D	Conditional, Partial Expectation			
18.25	E	Conditional, Partial Expectation			

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 19 – Monte Carlo Valuation

19.1	C	Std. Dev. of Monte Carlo Est.	19.6	B	MC Valuation in Binomial Model
19.2	B	Std. Dev. of Monte Carlo Est.	19.7	A	MC Valuation in Binomial Model
19.3	D	Forward Price, Monte Carlo Val.	19.8	A	Sum of Uniformly Dist'd RVs
19.4	B	Path Discount Rate	19.9	A	Sum of Uniformly Dist'd RVs
19.5	D	Path Discount Rate	19.10	E	Inverse Cum. Normal Dist.

19.11	B	Inverse Cumulative Normal Dist.	19.26	D	Stratified Sampling
19.12	E	Sequence of Stock Prices	19.27	B	Stratified Sampling
19.13	A	Geometric Avg. Strike Call	19.28	E	Normal RV's as Quantiles
19.14	C	Asian Call Options	19.29	E	Stratified Sampling Method
19.15	A	Std. Dev. of Monte Carlo Est.	19.30	C	Control Variate Method
19.16	C	Std. Dev. of Monte Carlo Est.	19.31	B	Control Variate Method
19.17	E	Std. Dev. of Monte Carlo Est.	19.32	E	Variance of Control Variate Est.
19.18	C	MC Valuation European Put			
19.19	D	MC Valuation Asian Put			
19.20	D	Control Variate Valn			
19.21	E	Control Variate Valn			
19.22	C	Variance & Control Variate			
19.23	E	Variance & Control Variate			
19.24	B	Antithetic Variate Method			
19.25	C	Control Variate Method			

## Chapter 20 – Brownian Motion and Itô's Lemma

20.1	C	Sharpe Ratio	20.21	C	Valuing a Claim on $S^a$
20.2	E	Diffusion Process	20.22	E	Delta and $S^a$
20.3	D	Confidence Intervals	20.23	E	Power Option
20.4	E	Correlated Itô Processes	20.24	A	Valuing a Claim on $S^a$
20.5	C	Correlated Itô Processes	20.25	A	Risk-Neutral Process
20.6	D	Correlated Itô Processes	20.26	E	Itô's Lemma
20.7	B	Multiplication Rules	20.27	B	Itô's Lemma
20.8	D	Sharpe Ratio & Arbitrage	20.28	D	Geo. Brownian Equivalencies
20.9	E	Sharpe Ratio & Arbitrage	20.29	B	Geo. Brownian Equivalencies
20.10	A	Prepaid Forward Price of \$1	20.30	D	Geo. BM Equivalencies & SR
20.11	B	Sharpe Ratio	20.31	A	Itô's Lemma
20.12	C	Sharpe Ratio & Arbitrage	20.32	E	Geo. Brownian Equivalencies
20.13	A	Sharpe Ratio & Arbitrage	20.33	E	Correlated Itô's Processes
20.14	C	Sharpe Ratio & CAPM	20.34	C	Correlated Itô's Processes
20.15	C	Sharpe Ratio & CAPM	20.35	D	Ornstein-Uhlenbeck Process
20.16	C	Sharpe Ratio & CAPM	20.36	E	Risk-Neutral Process
20.17	D	Sharpe Ratio & Arbitrage	20.37	C	Risk-Neutral Process
20.18	A	Geo. Brownian Equivalencies	20.38	B	R-N Process & Sharpe Ratio
20.19	E	Geo. Brownian Equivalencies	20.39	E	Itô's Lemma
20.20	B	Sharpe Ratio	20.40	B	Risk-Neutral Process

## Chapter 20 – Brownian Motion & Itô's Lemma, cont'd

20.41	A	Geo. Brownian Equivalencies	20.76	E	Product Rule - Stochastic Diff Eq
20.42	C	Sharpe Ratio	20.77	D	Valuing a Claim on $S^a$
20.43	A	Black-Scholes Framework	20.78	D	Valuing a Claim on $S^a$
20.44	C	Brownian Motion Properties	20.79	E	Geo. Brownian Equivalencies
20.45	E	Probability	20.80	A	Geo. Brownian Equivalencies
20.46	C	Valuing a Claim on $S^a$	20.81	C	Geo. Brownian Equivalencies
20.47	B	Valuing a Claim on $S^a$	20.82	E	Geo. Brownian Equivalencies
20.48	B	Valuing a Claim on $S^a$	20.83	B	Geo. Brownian Equivalencies
20.49	A	Valuing a Claim on $S^a$	20.84	D	Sharpe Ratio
20.50	D	Valuing a Claim on $S^a$	20.85	B	Sharpe Ratio
20.51	D	Valuing a Claim on $S^a$	20.86	E	Geometric Brownian Motion
20.52	E	Valuing a Claim on $S^a$	20.87	C	Geometric Brownian Motion
20.53	A	Prepaid Forward Price of $S^a$	20.88	B	Geo. Brownian Equivalencies
20.54	C	Geo. Brownian Equivalencies	20.89	E	Geo. Brownian Equivalencies
20.55	A	Geo. Brownian Equivalencies	20.90	D	Multiplication Rules
20.56	E	Risk-Neutral Process	20.91	D	Drift & Itô's Lemma
20.57	A	Stochastic Differential Eq.	20.92	B	Itô's Lemma & O-U Process
20.58	D	Geom. BM & Mutual Funds	20.93	E	Itô's Lemma
20.59	E	Probability	20.94	E	Synthetic Risk-Free Asset
20.60	D	Probability	20.95	C	Valuing a Claim on $S^a$
20.61	C	Correlated Itô Processes	20.96	B	Sharpe Ratio
20.62	A	Ornstein-Uhlenbeck Process	20.97	C	Sharpe Ratio
20.63	E	Ornstein-Uhlenbeck Process	20.98	C	Geometric Brownian Motion
20.64	E	Correlation Coefficient	20.99	D	Black-Scholes Formula
20.65	C	Valuing a Claim on $S^a$	20.100	B	Sharpe Ratio
20.66	D	Power Option	20.101	E	Claim on $S^a$
20.67	E	Sharpe Ratio	20.102	D	Claim on $S^a$
20.68	E	Sharpe Ratio	20.103	C	Power Option
20.69	B	Itô's Lemma	20.104	E	Power Option
20.70	B	Itô's Lemma	20.105	E	Power Option
20.71	E	Geom. BM & Mutual Funds	20.106	B	Power Option
20.72	B	Geom. BM & Mutual Funds	20.107	D	Power Option
20.73	D	Geom. BM & Mutual Funds	20.108	A	Quadratic Variation
20.74	A	Multiplication Rules	20.109	A	Volatility of Prepaid Forward
20.75	E	Multiplication Rules	20.110	B	Volatility of Prepaid Forward

Download free full solutions from [www.ActuarialBrew.com](http://www.ActuarialBrew.com) or purchase a printed copy.

## Chapter 20 – Brownian Motion & Itô's Lemma, cont'd

20.111	C	Forward Exchange Contract	20.121	A	Standard Brownian Motion
20.112	D	Claim on $S^a$	20.122	A	Geometric Brownian Motion
20.113	A	Sharpe Ratio and 2 Stocks	20.123	E	Sharpe Ratio & Arbitrage
20.114	B	Sharpe Ratio and 2 Stocks	20.124	C	Arbitrage

## MFE/3F Table Provided by the SOA

The printed normal distribution table should only be used if you don't have access to the online normal distribution calculator. We recommend using the online normal distribution calculator when working exam-style questions. The printed normal distribution table is provided in case internet access is not available.

Unless otherwise stated in the question, assume:

- The market is frictionless. There are no taxes, transaction costs, bid/ask spreads, or restrictions on short sales. All securities are perfectly divisible. Trading does not affect prices. Information is available to all investors simultaneously. Every investor acts rationally and there are no arbitrage opportunities.
- The risk-free interest rate is constant.
- The notation is the same as used in *Derivatives Markets*, by Robert L. McDonald.

When using the normal distribution calculator, values should be entered with five decimal places. Use all five decimal places from the result in subsequent calculations.

In *Derivatives Markets*,  $\Pr(Z < x)$  is written as  $N(x)$ .

The standard normal density function is:

$$f_Z(x) = N'(x) = \frac{1}{\sqrt{2\pi}} e^{-\frac{1}{2}x^2} = \frac{e^{-x^2/2}}{\sqrt{2 \times 3.14159}} = \frac{e^{-x^2/2}}{\sqrt{2.50663}}, \quad -\infty < x < \infty.$$

Let  $Y$  be a lognormal random variable. Assume that  $\ln(Y)$  has mean  $m$  and standard deviation  $v$ . Then, the density function of  $Y$  is:

$$f_Y(x) = \frac{1}{xv\sqrt{2\pi}} e^{-\frac{1}{2}\left(\frac{\ln(x)-m}{v}\right)^2}, \quad x > 0$$

The distribution function of  $Y$  is:

$$F_Y(x) = N\left(\frac{\ln(x)-m}{v}\right), \quad x > 0$$

Also,  $E[Y^k] = e^{\left(km + \frac{1}{2}k^2v^2\right)}$

which is the same as the moment-generating function of the random variable  $\ln(Y)$  evaluated at the value  $k$ .

## Printed Normal Distribution Table

Entries represent the area under the standardized normal distribution from  $-\infty$  to  $z$ ,  $\Pr(Z < z)$ .

The value of  $z$  to the first decimal is given in the left column. The second decimal place is given in the top row.

$z$	0.00	0.01	0.02	0.03	0.04	0.05	0.06	0.07	0.08	0.09
